1. 点击 "安装键盘" ，或者在设置中找到本应用程序, 这时会跳转到对应的设置页面。

Click "Install Keyboard" or find the application in the settings, then jump to the corresponding settings page.

2.点击 "键盘选项"，有时可能不会出现，切换出去，重新进来，或者返回主应用，重新点击 "安装键盘"，如果需要使用语言功能还需开启麦克风权限，语言识别需要可以网络访问权限

Click on "Keyboard Options" and sometimes it may not appear, switch out, re-enter, or return to the main application, re-click on "Install Keyboard". If you need to use the language recognition function, you need to turn on the microphone permission. Language recognition needs access to the network.

NO WORDS KEYBOARD SETTINGS

无字输入法 使用说明

步骤1:点击上的键盘选项，有时可能键盘选项不会出现，切换出去重新进来。

步骤2:打开 输入法开关，之后还有一个选项是完全访问的，也同样打开，不然是无法访问剪切板的和语音输入的。

3.赋予键盘使用权限，打开开关，还有一个完全访问的开关，这个也需要打开，不然无法复制内容进去，也无法进行语音的识别。

Give keyboard access, open the switch, and have a full access switch, which also needs to be turned on, otherwise it can not copy content into, nor can it recognize voice.

4.每次使用过粘贴功能之后会把剪切板清空，语言识别需要主应用后台开启，录音和识别功能是由主应用来完成的。如果不需要输入时的动画效果可以关闭"模拟手动输入"的开关。

Each time the paste function is used, the clipBoard will be emptied. Language recognition needs the main application opened in the background. The recording and recognition functions are completed by the main application. If the input animation effect does not need, you can turn off the " Input animation" switch.
